KELVA CORRUGATED CLEANER ST85CC

DOUBLE-SIDED, NON-CONTACT WEB CLEANING

To remove dust and particles from wide webs in an efficient way, the new KELVA Corrugated Cleaner ST85CC features a very powerful airflow of both vacuum and blowing air, as well as integrated antistatic bars.

Opening and closing of the cleaner is handled by pneumatic cylinders lifting the upper part to allow access for web threading and service. The standard lifting height is 80 mm, and the upper part can be adjusted to increase/ decrease the gap between the two parts. The ST85CC is as standard equipped with a 2-step gap adjustment to allow for double wall corrugated web/ sheets.

The circulating air is connected to the cleaner through high-speed hose connections to minimize pressure drop.

Specifications

Sizes The ST85CC is usually made to fit corrugated standard widths of

2200, 2500 and 2800 mm. Other sizes can be produced as well.

Antistatics Integrated 230V/50Hz or 115V/60Hz with high voltage cables and

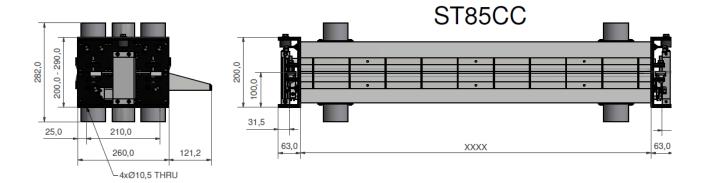

power unit. .
