

Non Contact Web Cleaner

BR45

Improved Quality

– With Kelva's Effective Low-cost Web Cleaning Head

- Web width up to 1400mm
- Effective 3-chamber solution
- Cleans both sides of the web simultaneously
- Low operation and service costs
- No interference on web guiding or web tension

Kelva's web cleaning head BR45 is opened manually to facilitate the threading of the web.

It is used in applications such as paper, film, tissue and textile. BR45 has connections at both ends over 1000mm.

Active discharging antistatic equipment is available as an option.
